### Message from Salvatore

Pizza was originally made as 'slow food' in Europe. However, when it was introduced in America, it began to be served as fast food. Our approach is to serve it fast like the American pizza, but in the original Napoli style. It is very challenging to do this, while keeping the original recipe and cooking procedure. That is why I see a great significance in our achievement, being able to serve an authentic Napoli pizza without sacrificing taste and quality. To follow my craftsmanship, we do not compromise on any of the 'hand-made' elements, ingredients, or original recipes. My goal is for everyone to enjoy Napoli pizza in their home, just like in my hometown. This is what motivated me to become who I am, I like to say that my identity starts and ends with Pizza. Napoli pizza has just begun to be recognized in Japan, and Salvatore Cuomo is here to serve everyone the real deal.
